

EVAPCO Air Solutions On The Go

**We are excited to announce the official name change of
The Company Formerly Known as Flex Coil to
EVAPCO Air Solutions**

Announcement of company name change

In 1992 a small team wanted to start a company focused on flexibility and customer needs in the heat exchanger industry and Flex coil a/s was born. The company grew and became one of the leading Heat Exchanger companies in Denmark. The industry took notice and so did EVAPCO, one of the industry leaders in the engineering and manufacturing of quality heat transfer products.

For 7 years, Flex coil has been a wholly owned subsidiary of EVAPCO inc. but to be fully part of the family and to fulfill the vision of Evapco, we have decided to take it one-step further.

You can see a new logo on top of this letter, and with that, we are excited to announce that we are officially changing our company name to EVAPCO Air Solutions a/s. The company will continue to operate in its current structure and there has been no change in ownership, staff or location. At the same time, we will have the new web domain, www.evapcoairsolutions.dk and all email addresses "initials@evapco.dk", to reflect and strengthen the corporate identity. The old e-mail addresses and website links are still active and will remain active for an extended period of time. For accounting purpose, bank information remains unchanged except the name of the account holder to the new company name.

Now all Evapco & Evpaco Air Solutions Representatives can say that they offer the complete package of cooling solutions.

"LET'S BUILD SOMETHING COOL TOGETHER"

We look forward to your continuous success, and sharing with you our excitement about the progress and changes we are making under the new company name.

As always
Good selling...

Tom Byrne
